

There Is A Thread For ThatSM

A **NON-SURGICAL + COLLAGEN BUILDING**
SOLUTION TO RESTORE YOUR NATURAL BEAUTY

WHAT ARE POLYDIOXANONE (PDO) THREADS?

PDO is a crystalline, biodegradable synthetic polymer. It is one molecule different from a sugar molecule. It is a bioabsorbable synthetic material used to make self-absorbing sutures for more than 20 years in orthopedics, surgery, plastic surgery and ophthalmology.

The body naturally breaks it down by hydrolysis and the biomaterial is completely reabsorbed in 6-9 months.

HOW DO THEY WORK?

The PDO thread is a special medical grade thread that is thinner than hair that is inserted into either the intradermal tissue (if using smooth threads) or subcutaneous (if using barbed threads) for temporary support of the area being treated. Over the next 6 months, the body dissolves the PDO threads which stimulates neo-collagenesis, which is the production of new collagen in the skin. It also stimulates elastin and hyaluronic acid, both substances are key to maintaining firm, youthful looking skin.

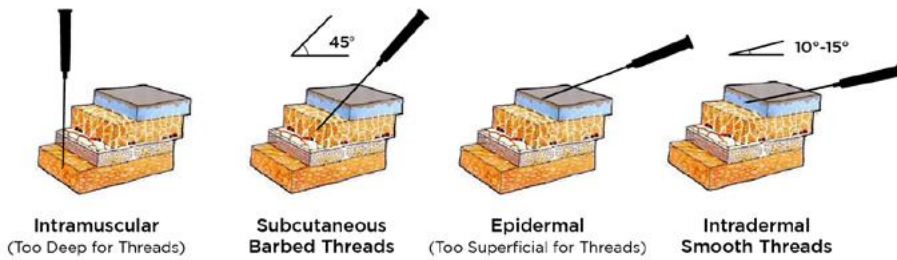

There are two types of threads:

Barbed threads have tiny “hooks” in a staircase pattern around the thread that attach to the tissue and are used to reposition, lift and secure static, sagging skin.

Smooth threads are placed in the tissue to repair and tighten wrinkled, crepey skin by replacing and adding collagen and elastin to damaged areas, resulting in a smoother, plumper appearance.

Levo, Levo Lock, and Smuth threads*

THE PDO MAX ADVANTAGE

Safety is #1:

We are one of only a few Polydioxanone (PDO) Thread companies that has a fully FDA cleared thread in cannula product. Both PDO Max and our manufacturer in Korea are ISO-13485 certified and fully insured. PDO Max has also been awarded MDSAP certification.

Diverse Product Lineup with Superior Grip and Tensile Strength:

We continuously develop new products and tools to enhance the overall PDO thread experience and procedure. Our 6D barbed pattern offers the best patient outcomes of any thread on the market.

Designed and Manufactured by PDO Max:

We research and design our own thread products. Every package is properly labeled with our branding, lot numbers, and GUDID (FDA required tracking) QR code.

WHAT HAPPENS DURING TREATMENT?

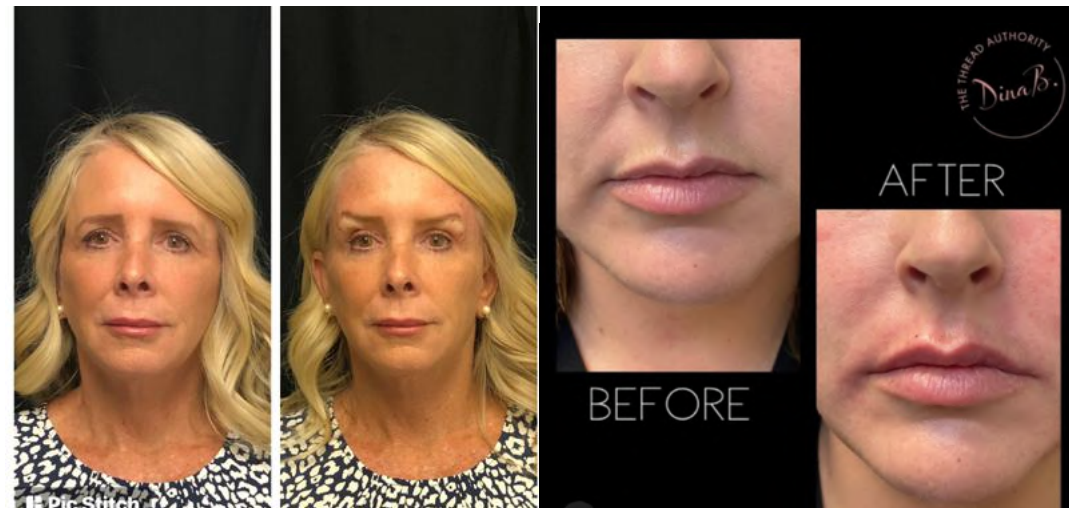

To keep patients comfortable, a Lidocaine and Epinephrine injection is applied to the entry points following which threads are introduced into the skin through a fine needle/cannula- into either the intradermal dermal (smooth threads) or the subcutaneous dermal layer (barbed threads). The treatment results in an immediate improvement in appearance and the results will improve over the coming days, weeks, and months as the PDO stimulates collagen in the skin. The appearance of the skin improves in terms of overall texture, becoming thicker, tighter and firmer as fine lines and wrinkles are reduced.

WHAT IS THE DOWN TIME?

Since a PDO thread lift is a minimally invasive procedure, the recovery time is quick. Most patients who get this procedure done return to their normal activities after a day. Minor inflammation and bruising may occur in the first few days, but they usually resolve after two weeks.

Neck Lift: Courtesy of Sherrine Richmond, used Levo 18Gx100mm

Brow Lift: Courtesy of Sherrine Richmond, One Aesthetics, used Levo Locks 18Gx100mm

PDO TREATMENT
AREAS: **FACE**

● Levo Barb ● Smooth ● Ciclones ● Multi-threads

● Levo Barb ● Smooth ● Ciclones ● Multi-threads

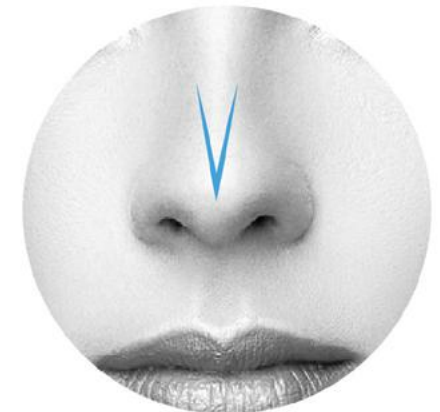

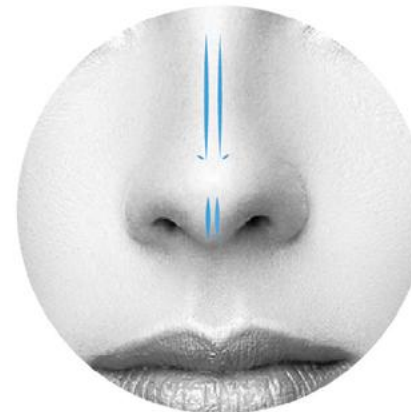

Eyebrow Lift

- Levo 19G x 60mm (normal skin)
 - Smuth S 30Gx38mm or Smuth S 30Gx25mm
- Alternatives:
- Levo 23G x 60mm (thin skin)

Eyebrow Lift

- Levo 23G x 60mm
- Alternatives:
- Levo 19G x 60mm

Nose

- Levo 19G x 38mm Nose - Tip
- Levo 19G x 50mm Nose - Bridge

Nose

- Levo 19G x 38mm Nose
- Alternatives:
- Levo 19G x 50mm Nose

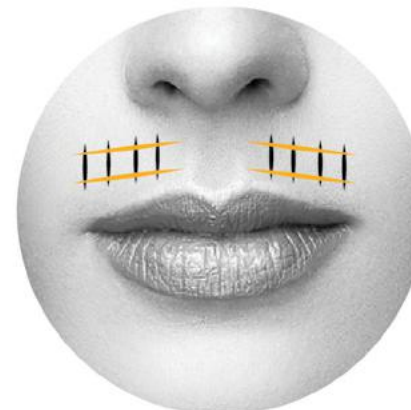

Fox Eye

- Levo 19 G x 60 mm from top
 - Levo 21 G x 100 mm from bottom
- (Inferior to Superior with 19G or 21G, 2-4 depending on anatomy)

Sleeping Wrinkles

- Ciclone 26G x 38mm
 - Smuth S 30G x 38mm
- Alternative:
- Double Ciclone 25G x 38mm (deep lines)

Barcode Lines

- Ciclone 26G x 38mm (deep lines)
- Alternative:
- Smuth S 30G x 25mm - Vertically
 - Smuth S 30G x 38mm - Horizontally

Lip Contour

- Ciclone 26G x 38mm
- Alternative:
- Double Ciclone 25G x 38mm (more contour)
 - Smuth S 30G x 38mm (subtle contour)

● Levo Barb ● Smooth ● Ciclones ● Multi-threads

Nasolabial Folds

- Ciclone 26G x 38mm
- Alternative:
- Double Ciclone 25G x 38mm

Nasal Labial / Temporal Hollows / Marionette

- Multi Thread 23 G x 38 mm
- Multi Thread 23 G x 60 mm

Lip Commissure "Gio" Cheek

- Levo 19 G x 100 mm
- Supplement with Smuth S 30 G x 38 mm or Smuth S 30 G x 25 mm

Cheek Lift

- Levo 18G x 100mm
- Smuth S 30G x 38mm
- Smuth S 29G x 50mm
- Alternatives:
- Levo 19G x 100mm
- Advanced:
- Levo Molded 19G x 100mm
- Levo Molded 18G x 100mm

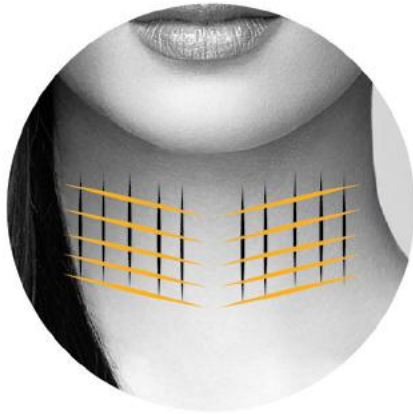

Nose Threads: Courtesy of Sherrine Richmond, One Aesthetics

Before & After: Courtesy of Whitney HuttenLocker, used Levo 19Gx100mm and 18Gx100mm

Tech Neck

- Ciclone 26G x 38mm
- Smuth S 30G x 38mm
- Alternative:*
- Ciclone 29G x 60mm
- Double Ciclone 25G x 38mm

Neck

- Levo 19Gx100mm (most skin types)
- Smuth S 30G x 38mm
- Alternatives:*
- Levo 18G x 100mm (thick, heavier skin)
- Levo 21G x 100mm (thin skin)

Crow's Feet

- Smuth S 30G x 25mm

Dark Circles

- Smuth B 30G x 38mm

Under Eye

- Smuth B 30G x 38mm (Normal Skin)
- Smuth B 29G x 38mm (Thicker Skin)

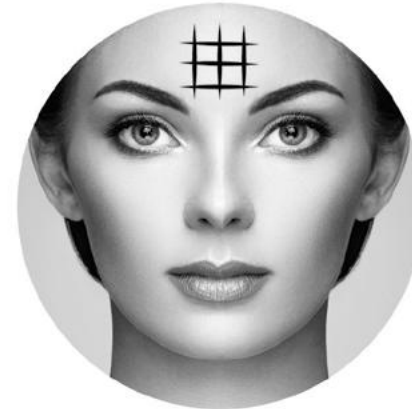

Neck Lift

- Levo 18G x 100mm
- Smuth S 30G x 38mm
- Alternatives:*
- Levo 19G x 100mm
- Levo 21G x 100mm

Neck Lift

- Levo 18G x 100mm
- Smuth S 30G x 38mm
- Alternatives:*
- Levo 19G x 100mm
- Levo 21G x 100mm

Frown Lines

- Smuth S 30G x 38mm

Glabellar & Inner Eyebrow

- Levo 23G x 60mm
- Smuth S 30G x 38mm

Before & After: Courtesy of Bianca Pierson, used Smuth threads

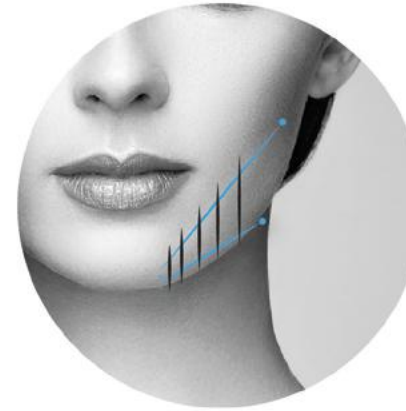

Neck Lift: Courtesy of Hula Castellon, used Levo and Levo Lock threads

Before & After: Courtesy of Kirsten Ziomek, used several Smuth threads and Levo 19Gx100mm

● Levo Barb ● Smooth ● Ciclones ● Multi-threads

Jaw

- Levo 19 G x 100 mm (Thin Skin)
- Levo 18 G x 100 mm (Normal / Thick Skin)
- Supplement with Smuth S 30 G x 38 mm smooth threads.

Marionette & Jawline

- Levo 18G x 100mm
- Smuth S 30G x 38mm
- Alternatives:
 - Levo 19G x 100mm
 - Levo 21G x 100mm

3 Vector Cheek & Jowl

- Levo 19 G x 100 mm (Normal Skin, will use on majority of patients)
- Levo 18 G x 100 mm (Thick, Heavy Skin)
- Levo 21 G x 100 mm (Thin Skin)
- Supplement with Smuth S 30 G x 38 mm or Smuth S 29 G x 50 mm for contour and volume loss.

Full Face Soft Lift

- Levo 18G x 100mm
- Smuth S 30G x 38mm
- Smuth S 29G x 50mm
- Alternatives:
 - Levo 19G x 100mm
- Advanced:
 - Levo Molded 19G x 100mm
 - Levo Molded 18G x 100mm
